

**KERNELECTRONICS INC.**

**AUTObag System 4 Specifications:**

P.O.S. Input: Compatible with any POS system equipped with a PC compatible serial or parallel printer port.  
PAR 2 compatible using Kern Electronics PPI-100 PAR Printer Interface Unit.

Printer Output: Parallel output to Epson TM-T88 or equiv.

Power: Powered from Epson PS-180 printer supply.  
Worldwide electrical approvals (CE, CSA UL etc.)

Dimensions: Computer Module: 6.25W x 1.25H x 7.0D (inches)  
Scale/Scanner: 14.0W x 3.0H x 14D (inches)

Shipping Weight: Approx. 21 Lbs.

Capacity: 6kg, 2g resolution.

Warranty: Two year limited ship-and-replace depot warranty.

ITEM NO.

**AUTObag(TM)  
Order Accuracy System  
Model 4**

**MODELS: AB4**

**AB4 FEATURES:**

The AUTObag Total Order Accuracy system is a proven, effective solution for ensuring order accuracy and faster service in drive-thru. AUTObag instantly assesses orders by weight to determine if any food item is missing.

AUTObag removes human error from drive-thru by providing a final automated check of assembled orders, alerting crew of missing food items.

Using a patented algorithm, it can reliably detect missing items from small or large, multi-bag orders. AUTObag is faster than checking orders by hand. It speeds service up an average of 5 seconds per car and makes the crew's job easier and less stressful.

The system connects to any POS system as a printer, and prints the customer receipts with a bar code attached that is then scanned by the crew to check each order. The bar code is created using product weights and descriptions programmed into the system separately from the POS system.

When properly used and maintained, AUTObag can eliminate complaints related to food shortages, reduces fraudulent customer claims, and increase order accuracy significantly.

Multilingual capability allows operation in most languages.

AUTObag can also drive a remote display drive-thru timer Model T2. Time starts when receipt is printed, stops upon manual key press.

**System Equipment Included:**

- 1- CPU-400 Computer Module
- 1- SSU-400 Scale/Scanner Unit
- 1- Cable set
- 1- POS Cable (POS specific)

**Optional Equipment:**

- Epson TM-T88 Printer
- Power Supply, Epson PS-180
- T2 Drive-Thru ("30 Second") Timer with Remote Display
