

T3C Counter-Mount Service Timer

Manual / Semi-Automatic with Double-Sided Display

The T3C Counter-mount Timer is intended for front-counter use. Timing cycle can be started by integral pushbutton or by a Printer Trigger device that starts the timer automatically when a receipt is printed (compatible with most P.O.S. systems).

Timing cycle is ended by pressing a second integral 'served' pushbutton.

Average service time of the past 20 (or more) orders can also be displayed.

The T3C interfaces to the ScoreBoard(TM) Real-Time Information Display, which provides crew and management with continuous service time analysis.
